[6.15] Number of university sustainability program(s) with international collaborations

	
<p>Collaboration project between the Universidad Politécnica de Madrid, Escuela Técnica Superior de Arquitectura, with the Universidad Central de Venezuela, for a joint program of the subject of architectural projects during the academic year 2023-2024.</p>	<p>It is designed under an open structure where teams of 7 and 8 level students from both universities work together in a joint project and dynamics. It is also planned to transform the academic teaching of traditional universities into learning structures in the manner of Telefónica's Campus 42.</p>

An ecomuseum is "A museum center oriented on the identity of a territory, based on the participation of the inhabitants and on the growth, welfare and development of the community". It is an instrument that the political power and the population conceive, manufacture and exploit together.

Description:

The course is in development, and consists of the design of an Ecomuseum in Paria, Venezuela; where the proposals must respond to the sustainability of the territory (social, economic, cultural, etc.). It began in September 2023 and has a duration of 14 weeks. It is taught in a blended manner, face-to-face and online. A "peer-to-peer learning" methodology is applied. It involves 60 students from both universities, corresponding to the highest levels of each grade.
