[6] Education and Research (ED)

[6.1] Number of Courses/Subjects Related to Sustainability Offered

| Course title | Notes |
|--------------------------------------|---|
| Sustainability and innovation at UCV | Training course that incorporates topics related to urban and environmental sustainability. It focuses on skills development, including project formulation and reflective practices. |

Description:

Is a course under development, whose objective is to train students of architecture and urban planning in the objectives of sustainable development and its application to projects. It is open to students from different universities, at any level of study. It will start in March 2024 and will last 15 weeks. It will be taught online. The result will be sustainable projects that can be applied to the university campus of the Universidad Central de Venezuela, a world heritage site.

2023: formulation and marketing

2024: delivery of the course and project development

Total number of courses with sustainability embedded for courses running in 2023/2024: 1
